We are looking for patients who:
- Have Schizophrenia, or Bipolar Disease, or Schizoaffective Disorder
- Are taking an antipsychotic medication
- Are between the ages of 18 and 65 years old

Dr. Daniel Yohanna at the University of Chicago is conducting a research study assessing the eating patterns of people who have Schizophrenia, Bipolar Disorder, or Schizoaffective Disorder who are taking antipsychotic medication. This research is being done because we do not yet know what the best treatment is for patients who have risk factors for or who have metabolic syndrome. This is a voluntary research study.

Ask your psychiatrist today if this research study is appropriate for you, or for more information call: 773-702-9043.
