The University of Chicago  
5841 S. Maryland Ave. Chicago

Are you a  
Healthy  
Man or  
Woman?

## Seeking Research Volunteers

If you are a healthy man or woman between the ages of 18 & 55 and are not taking any psychiatric drugs, you may qualify for a research study investigating how brain waves change in response to emotional images and how to measure emotion related brain activity so that treatments may be improved for the benefit of future patients.

Dr. Lee at The University of Chicago is conducting a research study in which we are testing specific brain wave patterns relating to processing of emotional information.

Participants will receive a confidential, no-cost, behavioral and medical evaluation to see if they qualify to enter the study. This study will take up to 6 hours to complete and involves having up to 2 EEG's performed while viewing a series of facial images. Participants may receive up to \$190 over the time of the study.

Secure parking is available at no cost.
